## Athena OSINT

Although web intelligence technologies are continually and dramatically evolving, collecting, organising and analysing vast amounts of information quickly and efficiently is still considered an immensely challenging task in cyber warfare and systems protection. Athena OSINT provides intelligence organisations with tools that assist them to deeply understand their investigated entities, identify future entities of interest, and highly personalise their next strategic and/or tactical interaction with them.

## Athena OSINT is Unique

With its advanced tools, Athena OSINT provides a comprehensive solution that supports cyber intelligence tasks. The system provides analysts with an easy-to-use interface that can generate, manage and present searches in a unique, dynamic and timely report.

Athena OSINT is the OSINT system that provides you with:

### End-to-end Capabilities

Provides an advanced end to end environment for managing and controlling the system's task and users through all stages of collection, analysis & reporting.

### Cost effective Solution

An intuitive system providing rapid results without relying on highly skilled analysts.

### Real time Collection

Designed to remain highly responsive during complex data analysis of vast amounts of information across the surface and deep web.

### Stealth & Secured Environment

Full hardware segregation providing a complete and comprehensive network source anonymisation & encryption.

## Athena OSINT Excels

### Profiling

Easily manages all your entities as well as revealing and enhancing their profiles. View detailed information about entities of interest such as locations, contacts, devices, accounts and networks.

### Gathering

Sorts through billions of data points across the surface and deep web in real time and provides actionable insights all with low digital signature.

### Analysing

Dynamically weights and scores each data point and takes smart decisions regarding which data to present. The system quickly analyses all information and reveals your unknowns; better enabling you to keep pace with emerging threats.

### Delivering

Carries out the entire Open Source Web Intelligence process in a single, timely, end-to-end solution providing you with feature-rich and detailed reporting specific to your task.
