

The perfect mission-critical solution configured for your high-end compute needs

MIL-STD-461G-certified supporting front-removable SSDs and double-wide NVIDIA GPUs, the 3U BAM XRS optimises performance to provide warfighters across all domains with a tactical advantage in real-time.

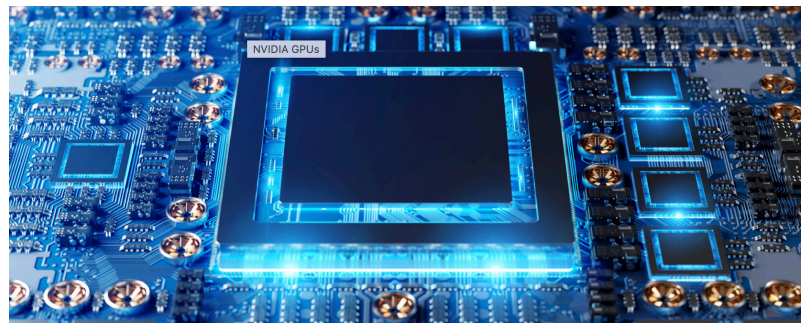

Supports up to 8 high-speed, self-encrypting SSDs

A mixture NVMe, SAS, and SATA drives safely store and retrieve critical intelligence within seconds to increase situational awareness and shorten response times in the harshest of environments.

Multiple NVIDIA A100 GPUs accelerate AI/ML/DL workloads

Next-gen GPUs enhance inferencing, parallel processing, and graphics rendering to deliver actionable insights and help you stay vigilant of emerging enemy threats.

Designed to meet MIL-STD-461G

With extra depth and an EMI-filtered power supply, reduce electromagnetic interference to avoid damaging critical components and existing infrastructure.
